

Angela Emile Jose

+91 9846469020 | angelaemilejose@gmail.com | LinkedIn | Portfolio | GitHub

AI/ML engineer building LLM-powered applications (RAG, prompt engineering, vector databases), computer vision systems, and full-stack tools — skilled in Python, APIs, and cloud deployment, with experience communicating technical concepts across audiences.

Education

Kyungpook National University

South Korea

Bachelor of Engineering in Computer Science (Double Degree Program) | Aug 2026

Christ University

Bangalore, India

B.Tech in Computer Science, Specialization in AI/ML | GPA: 3.88/4.0 |

Professional Experience & Research

Research Assistant – SSE Lab, Kyungpook National University

South Korea | May 2025 – Feb 2026

- Automated formal verification of C programs by building an LLM-driven pipeline that translates program specifications into formal verification languages, enabling automated checking via the CBMC model checker.
- Advanced research on applying large language models (LLMs) to software formal verification as part of an academic research initiative.

Research Intern – MLFM Lab, Kyungpook National University

South Korea | May 2026 – June 2026

- Achieved a 0.91 correlation coefficient in multi-modal lung image alignment by engineering and validating machine learning models for medical image registration across multi-source clinical imaging data.
- Improved reliability of automated diagnostic data-fusion pipelines by optimizing multi-source data fusion and preprocessing workflows for complex, multi-modality clinical datasets.

Research Assistant Intern – Computational Biology and Bioinformatics Lab

South Korea | Sept 2024 – Nov 2024

- Supported computational biology research by processing and analyzing biological datasets.

Research Assistant Intern, AI Department – ThinkPalm Technologies Pvt. Ltd

India | April 2024 – May 2024

- Built automated visual recognition capabilities by implementing object detection and image classification algorithms across small-scale AI projects.

Projects

ReportRAG | Python, FastAPI, LangChain, FAISS, Llama 3-70B, PyMuPDF

Dec 2025

- Reduced LLM hallucinations and enabled accurate insight extraction from 100+ page financial reports by architecting a multi-source retrieval-augmented generation (RAG) system using Llama 3-70B (Groq API) and a FAISS vector retrieval pipeline.

Fire Detection System: YOLO-CLIP Hybrid | YOLO11, CLIP, InternVL, Python

Mar 2026 – May 2026

- Achieved an F2-score of 0.833 and reduced false negatives in automated hazard detection by co-authoring and publishing a hybrid YOLO+CLIP architecture with contextual VQA-based captioning at KITS 2026.

Audio Noise Cancellation | TasNet-GAN, Deep Learning

Sept 2025 – Dec 2025

- Improved audio quality by 31% (PESQ) and speech intelligibility by 14% (STOI) by collaborating on a TasNet-GAN deep learning model for a low-cost hearing aid circuit, earning 1st place at the KICS conference.

Personal Portfolio Website (Live) | Next.js 14, TypeScript, Tailwind CSS, Framer Motion

Dec 2025

- Shipped a production full-stack portfolio with smooth Framer Motion animations by building on Next.js 14 and TypeScript, deployed on Vercel with continuous GitHub-integrated delivery.

Extracurricular Activities

English Mentor – International Writing Center, KNU

South Korea | June 2025 – Present

- Improved English proficiency and academic writing skills of Korean university students by providing one-on-one mentoring sessions.

KNU Student Ambassador (2024) | Video Contest Winner, KNU-OIA | Student Council Member, Christ University

Personal blog: blog.naver.com/angela_blogs

Skills

Programming Languages: Python, C, TypeScript, JavaScript

AI/ML & LLM Engineering: LangChain, RAG, FAISS (Vector DB), Prompt Engineering, LLM APIs (Llama 3, Groq), TensorFlow, Keras, Scikit-learn, Pandas, NumPy

Computer Vision: YOLO11, CLIP, InternVL, Object Detection, Image Classification

Web, APIs & Cloud: Next.js, React, FastAPI, REST APIs, Tailwind CSS, Framer Motion, Supabase (PostgreSQL), Vercel, Google Colab

Tools & DevOps: Git, Docker, JupyterLab, Linux Command Line

Languages: English (Fluent), Malayalam (Native)
